INTRODUCTION

AI researcher and founder with eight years at the frontier of applied ML, currently leading AI governance transformation and novel LLM research at BlackRock AI Labs, while co-building DigiSam Foundation to close the AI divide for rural women in India. Building towards the first state-aware design engine for conditional biologics, beginning with target-binding-triggered conformational switches that make precision therapeutics programmable by biological state. With strong wet-lab access through the University of Cambridge's Fruk Lab, whose research on stimulus-responsive nanocarrier delivery systems is directly adjacent to this problem space.

EXPERIENCE

Senior Data Scientist

BlackRock AI Labs

July 2025 – Present Edinburgh, United Kingdom

- ***AI Governance for Vision 2030:*** Leading a high-profile cross-functional data science team to reimagine BlackRock's enterprise AI governance — redesigning processes and tooling to make governance an innovation enabler rather than a compliance bottleneck, aligned to the firm's long-term strategic vision.
- ***ASIMOV — AI-powered investment research:*** Leading the agentic data visualisation workstream, delivering text-to-SQL and SQL-to-chart capabilities at scale. Research focus: improving structured data retrieval through pre and post-training of LLMs. **Python, Azure, OpenAI**. Featured in the *Wall Street Journal*.

Co-Founder & Director

DigiSam Foundation

May 2025 – Present Uttar Pradesh, India

- Lead organisational strategy, partnerships, and programme design across three workstreams: AI literacy training, last-mile delivery of government services, and building accessible AI tools for communities with low digital infrastructure, currently operational in Uttar Pradesh.
- Launched **Survey Sakhi** in Saidbhar village, UP, where a trained local community researcher surveyed all 250 households. Sharpest finding: 60% own smartphones yet 87% have never accessed a government service app; only 1.6% had heard of AI, yet 31% said yes to AI training. Result: 167 women (67%) already signed up for digital literacy programmes.

Senior Consultant — Data Science & GenAI

Capgemini Invent

Dec 2021 – July 2025 Glasgow, United Kingdom

- ***Project ASCEND (Dubai Dept. of Finance):*** Built a multi-agent system performing gap analysis of new financial processes against existing regulations, generating recommendations and KPIs, reducing report turnaround from weeks to minutes. **Azure, LlamaIndex, Python, Next.js**. Covered by Gulf News, Finance Middle East and the DOF.
- ***Knowledge graphs from unstructured data (UK Defence):*** Used LLMs to extract structured knowledge graphs from multi-format unstructured data at scale, enabling a digital model of UK defence and cutting modelling time from weeks to minutes. **Azure, OpenAI, Python**.

Data Scientist

Barclays PLC

July 2018 – Dec 2021 Glasgow, United Kingdom

Equity trade volume forecaster for Barclays Smart Investor, deployed on **AWS** (EMR, S3, SageMaker) using **Keras, TensorFlow, Spark**, with a full-stack **Angular** KPI dashboard.

EXPERIENCE

Assistant Professor

Meerut Institute of Engineering and Technology

Jan 2018 – May 2018 Meerut, India

- Taught **Machine Learning and Pattern Recognition** to undergraduate students. Organised a face detection hackathon and mentored a team to the finals of **Smart India Hackathon**.

EDUCATION

MSc (Machine Learning, Data Mining and High-Performance Computing)

University of Bristol

Aug 2016 – July 2017

Thesis: Synthetic faces for intelligent personal assistants

B.Tech. (Computer Science)

Dr. A.P.J. Abdul Kalam University

July 2011 – May 2015

PURSUITS

MasterChef UK 2025 Contestant

Selected from tens of thousands of applicants, competing on national television and cooking under intense time pressure before some of Britain's most demanding judges.

Google GenAI Global Hackathon Finalist

Built a PoC to analyse and surface media bias in Spotify news podcasts using Google's GenAI stack (July 2023)

Expedia & ENTER2020 Hackathon

Won best data visualisation award (Jan 2020)

2 full marathons, 3 half marathons

Also co-organised three community running events, 2017 to present

Save the Children

Volunteer — 2020 to 2024

SKILLS

AI & Research

LLMs | GenAI | AI Agents | Machine Learning

Engineering

Python | SQL | AWS | Cloud Computing

Leadership

Strategic Planning | Stakeholder Management | Team Building
